Cutting-edge Waterproofing Systems

We can provide effective waterproofing systems to all areas including landscaped areas, planter boxes, podiums, tanks, balconies, terraces, retaining walls and roofs. Where basements sit below the water table, we implement innovative solutions, such as geosynthetic or PVC sheet membranes which serve to completely tank the area. For external areas such as car parks, podiums, outdoor terraces, exposed rooftops, and landscaped gardens, our experts can use liquids and proprietary sheet membranes to obtain exceptional results.

High Performance Flooring Solutions

We are flooring preparation experts. We understand that providing an industry-leading range of flooring preparation solutions requires special care and attention, and we are willing to go the extra mile to ensure your floor prep is completed to the highest standard. We provide all types of flooring solutions based on our years of experience. We have expertise in providing technical solutions, selecting the right system, adhering to project specifications, high-quality workmanship, and floor finishes. Flooring improves the durability and aesthetic appearance of floors.

Remedial

Whether you own a residential home or a commercial building, it's imperative to get your waterproofing spot on to protect exposed surfaces and ensure the property retains its value. This is where the use of remedial waterproofing services from experts is vital. Krisha Technical Services can consult and provide long-lasting solutions for a range of different property types. Designed to save you money over the long term, we're able to fix issues such as membrane repairs, leaking basements and all facets of concrete crack repair

- Maintenance / repair works
- Metal roof coating services

STRUCTURAL CONCRETE REPAIR & SOIL STABILIZATION

Install, Repair, Replace & More.

We specialize in structural concrete repairs and soil stabilization. Any cracks or crevices that pose a threat to the structure's durability, reinforcement corrosion, or leaks/dampness are treated. We provide technical assistance and expertly carry out the process, which includes the use of all types of polyurethane, acrylic, and epoxy injections. Krisha technical services has the knowledge and experience to meet all of your waterproofing repair needs while keeping your project on track.

CONCRETE ROOF REPAIR AND RENOVATIONS

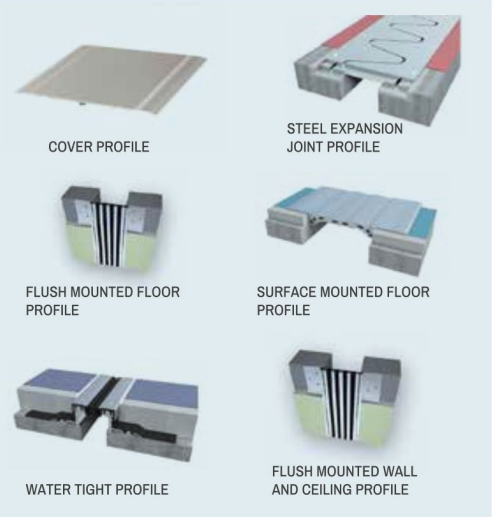

Installation And Repair.

We at Krisha Technical Services LLC have been providing roof repair & renovation services for all types of buildings. It doesn't matter whether it is a commercial establishment, shopping mall, office, factory, apartment or residential home, Krisha Technical Services ensures that our roof waterproofing and renovation services are compliant with international standards. We also ensure that concrete roof waterproofing complies with local laws and regulations. Krisha Technicl Services concrete roof waterproofing services guarantee long-term results. Whether for a terrace, roofing, an old or new building. We also adhere to all of their specifications, paying close attention to even the smallest details. Before beginning any roof waterproofing project, we handle all of the prerequisites and ensure that everything needed is on hand.

ROOFEXPANSION JOINT COVERS AND SOLUTIONS

Installation & Repair.

We Expansion joints are used to separate slabs and concrete from other structural components. When such movements are restrained, expansion joints allow independent movement between adjoining structural members, reducing cracking. Buildings are frequently constructed with flexible roof materials and structural expansion joints. We treat gaps based on their size and provide solutions to make them watertight with appropriate covers.

OUR SERVICES

METAL ROOF RENOVATION

Repair & Renovation.

We restore rusted, leaking zinc-aluminum roofs to long-lasting waterproofed coloured roofs in a color of your choice from 1600 options to increase the property's aesthetic value. Rust and other dirt that has accumulated on the roof are physically removed using a special roof cleaning machine. The leaking roofing sheet joints and fastener heads are then sealed with an in-situ formed liquid rubber membrane. We are dedicated to providing feasible and long-lasting solutions for old and new metal roofs with cracks and leaks. Also, roof over-cladding solutions are provided for very old roofs wherein the sheets are in a dilapidated condition, but the supports are strong enough and designed to take additional load.

FLOORING & FLOOR COATING SERVICES

Preparation, Installation & Repair.

We are flooring preparation experts. We understand that providing an industry-leading range of flooring preparation solutions requires special care and attention, and we are willing to go the extra mile to ensure your floor prep is completed to the highest standard. We provide all types of flooring solutions based on our years of experience. We have expertise in providing technical solutions, selecting the right system, adhering to project specifications, high-quality workmanship, and floor finishes. Flooring improves the durability and aesthetic appearance of floors.

CONCRETE TOPPINGS & SCREED WORKS

Installation, Repair & More

We provide complete concrete topping and screed services. Screed is an essential component of achieving a leveled surface and high-quality solid flooring. It can also be used to receive floor finishes, encase underfloor heating pipes, or be left as the wearing surface. When screeding concrete, the crew at Krishna Technical Services takes great care. Before finishing the concrete flooring to specification, it is the last and most important step. When a new slab is poured, screeding is required. Additionally, it can be added to improve the aesthetics of an existing concrete slab. Our team will deliver outstanding concrete flooring for your premises, perfectly suited to your needs. We will work with you through your project from start to finish, advising you on best practice and working with your building team to ensure perfect results. We can look at each individual project and advise on the most suited system and process.
